

Keeping visitors safe during the Coronavirus pandemic: Information for teachers

We are really excited to be welcoming your group to our wetland centre. During the period where we have been closed to learning visits, we have been making all of the necessary arrangements to keep visiting children and staff safe. We are now happy that we can welcome learning groups back safely. These are the main steps we are taking to keep everyone safe during their trip:

Displaying symptoms

- We are reminding people not to visit if they, or anyone they have been in recent contact with, is showing symptoms of Covid-19.

Numbers

- There can be a maximum of two schools or two school bubbles per day on site. Each social bubble will remain socially distanced from all other bubbles (as well as our staff / volunteers and the general public).
- These numbers will form part of our daily cap, ensuring that we have a safe number of people on site on any given day.

Social distancing

- For social distancing within your group we will follow the guidelines set by your school / setting.
- When under the supervision of our staff, social distancing will be maintained between the group, the general public and our delivery staff / volunteers.
- Changes have been made to the site to ensure that social distancing guidelines are able to be followed during times when your staff / helpers are guiding groups around the site.
- We will meet you from your coach / transport and assist with the maintenance of social distancing between the group and the general public as you enter the centre.
- The consequences of deliberate breaching of social distancing are made clear to all visitors including on the terms and conditions of entry.
- Where groups will be working in a single area for some time, this area will be cordoned off to keep your groups separate from the general public.
- You will be allocated a designated lunch space and place to store your belongings.
- You will be able to pre book the use of one of our play areas during the booking process if you require it. This area will have been cleaned in the morning as part of our daily cleaning routine and your groups will not mix with the general public in these areas.
- Learning groups will have their own dedicated, pre-booked time in the Observatory hide. The general public will not be allowed access during this time.

Ventilation

- Groups will be kept outdoors as far as possible and any indoor spaces that are used will be kept well ventilated.

Face coverings

- Our staff will wear face coverings when inside (staff are permitted to remove their face covering if talking to someone who lip reads).
- All visitors over the age of 11 are required to wear face coverings when inside unless they are medically exempt.

Hand hygiene

- Children and accompanying adults will wash their hands or apply hand sanitiser on their hands upon arrival, before eating, when leaving, between activities and at regular intervals during other parts of the visit.
- We have added extra hand sanitisation points around the centre.

Toilets

- You will be allocated your own designated cubicle and urinal for your own exclusive use during the visit. These will have been cleaned thoroughly prior to your visit.

Additional cleaning

- Indoor areas used and any items touched will be thoroughly cleaned between groups.
- The frequency and level of cleaning has been stepped up across the centre.
- Please dispose of your own litter so that this doesn't need to be handled by our staff. Thank you.

Resources

- There will be no sharing of resources except within social bubbles.
- Resources used will be disinfected and / or left 72 hours between use by different groups.

First Aid

- We will avoid any higher risk activities that may increase the likelihood of first aid needing to be given.
- First aid is to be administered by your staff unless additional assistance is required.

Illness during the visit

- If a member of your group should become ill with Covid-like symptoms during the visit, they will be accompanied (along with one of your accompanying adults) to a designated room where they will be isolated from the rest of the group whilst arrangements are made to get them home safely.
- Please ensure that your staff have the PPE required for this purpose.

Test and trace

- Please ensure we have the correct contact details for a lead member of staff and anyone in the group aged 16 and above so that we can engage with test and trace if required.
- Please inform us if anyone that came on the visit displays symptoms or tests positive within 14 days of their visit.

Coach drivers

- Where coach drivers are intending to come on site, they will need to be included in your numbers. Please advise them to bring a face covering for use in indoor areas and encourage them to remain outdoors as far as possible.

Training

- Any staff and volunteers who will be involved in formal learning delivery will have been made aware of all of the above guidance along with all relevant risk assessments beforehand.
