Create your own wetland bird

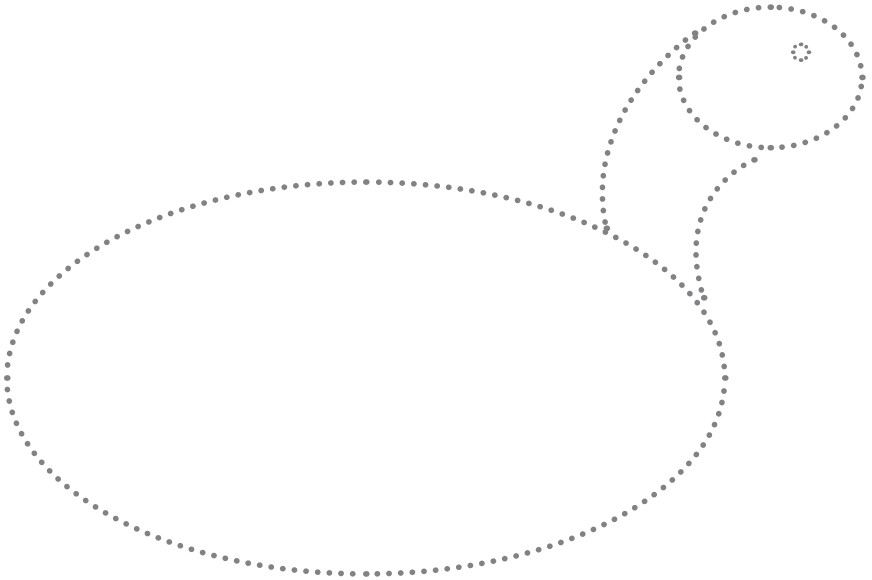
Draw 2 types of wing

What shaped wings will enable your bird to survive?

1. Observe the different beaks, wings and feet of the birds around you.
2. Draw 2 different beaks, wings and feet. One example has been done for you.
3. Choose a beak, pair of feet and wings to draw on the dotted outline and create your own imaginary bird.
4. What habitat would your bird live in? How do it's beak, wings and feet help it survive in this habitat?

Draw 2 types of beak

What beak will your bird need to feed?



Draw 2 types of feet

What feet will your bird need to move around its habitat?
