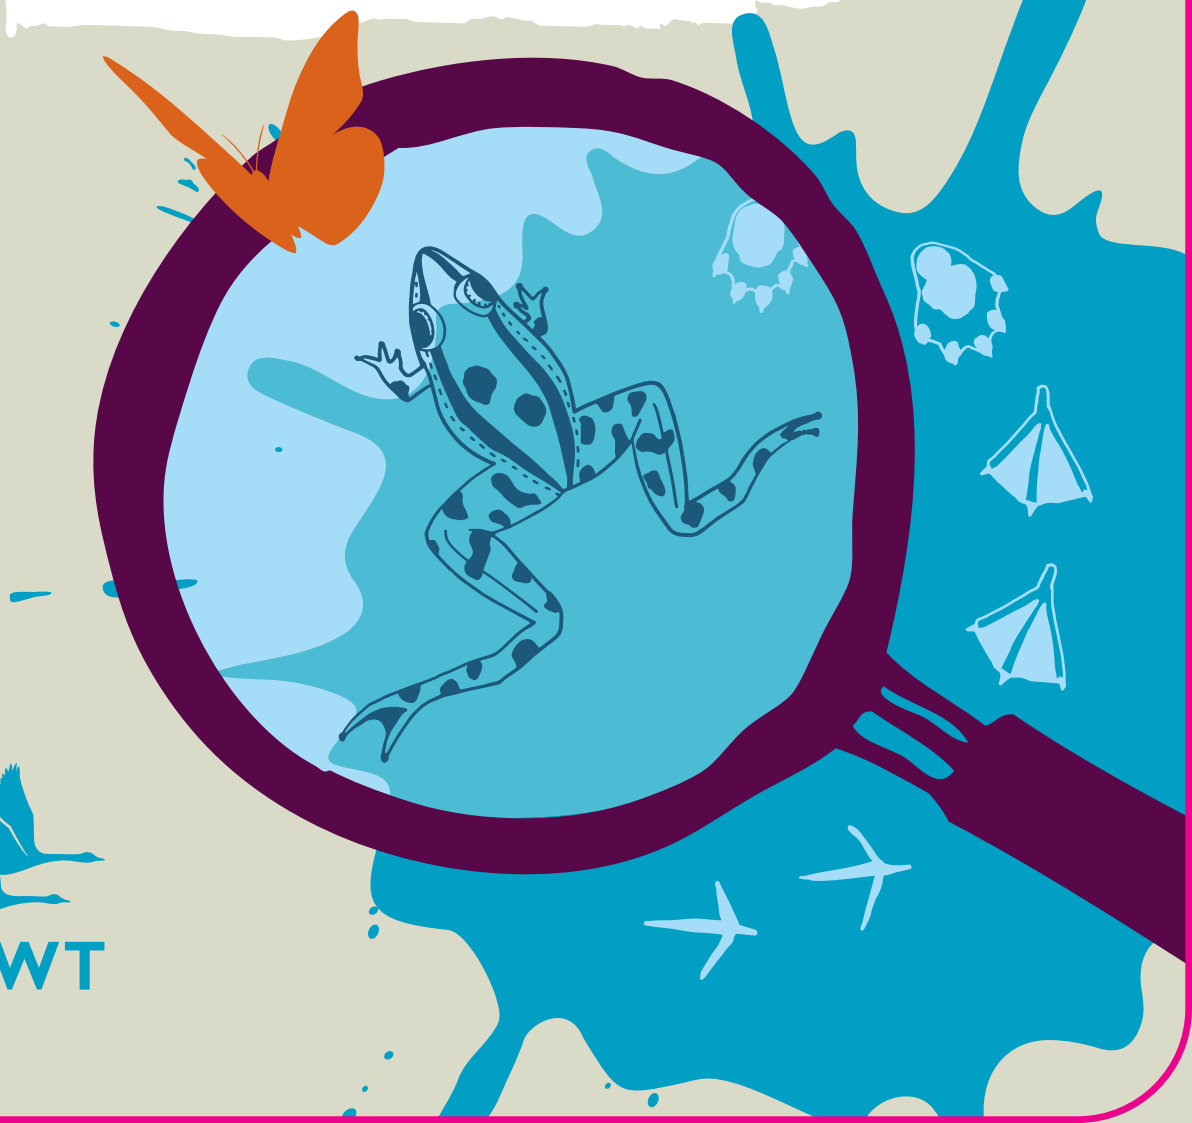
and discover our wetlands



WWT

How to play: top tips to play the **'explore and discover'** game. Have fun!

1. This game is about your class using their senses to explore the wetlands.
2. Organise the children into pairs or threes.
3. Ask each group to pick one blue card and one orange card.
4. Ask them to explore and find something that can be described by these two words.
5. Encourage your class to remember what they have found rather than touching or picking it with your hands.
6. Come back together as a class and find out what each group has discovered.
